

ABRASIVE RECLAIM MODULE

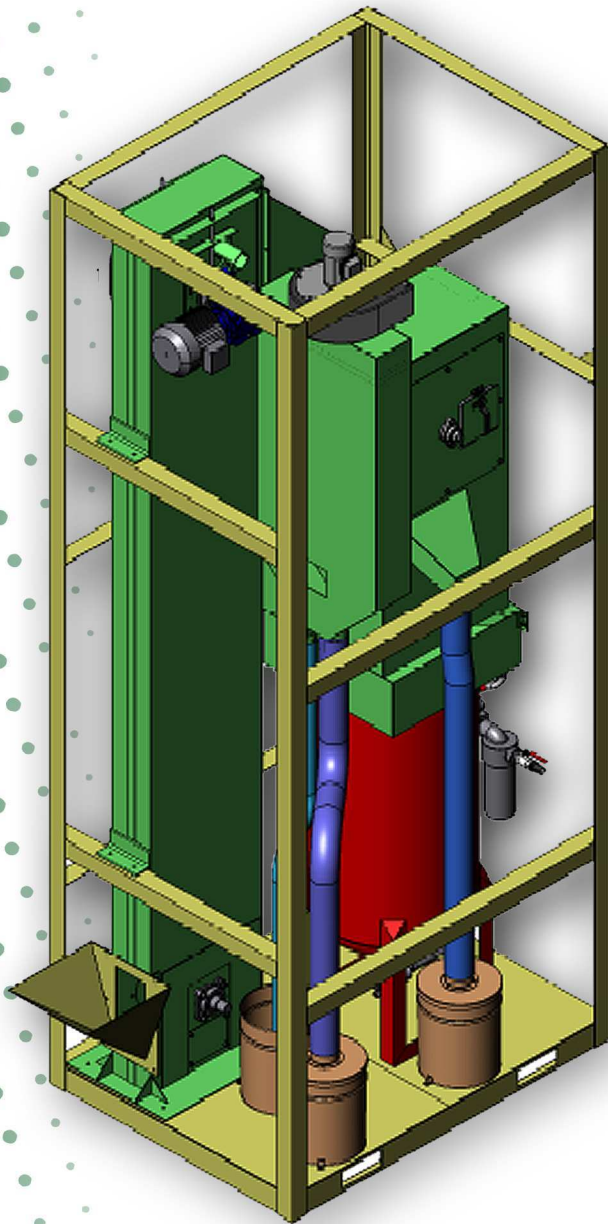

The **CMV portable abrasive reclaim module** can work with several types of abrasive media, like for example: steel shot/grit, aluminum oxide, glass beads, a.o.

The equipment frame allows it to be moved with fork lift truck and / or crane in the vertical or horizontal position.

It is a plug and play equipment that only requires the connection to the pressure pot, compressed air and electric supply according to the instructions on the manual.

The Abrasive Reclaim Module is composed by the following components:

- **Bucket Elevator**
- **Roller Sieve / Abrasive Separator**
- **Silo**
- **Dust Collector**

The ARM comes with a control panel that can be connected to 110V/1ph/60Hz power supply. This possibility allows great versatility for contractors.

Specifications

Model	Stationary ARM	Portable ARM
Capacity in gallons / h	73 gallons/h	73 gallons/h
Silo's capacity	73 gallons	73 gallons
Exhaust power	0,55 Kw	0,55 Kw
