

Is designed to work with steel shot (carbon or stainless steel), for cleaning, deoxidation, descaling, deburring, surface finishing for painting and shot peening.

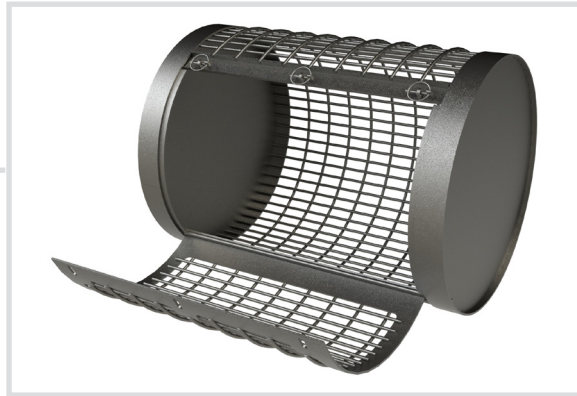

### Features

- **Blast wheel:** throw a higher volume of abrasive **with a velocity of about 20% higher** than the conventional blast wheels due to the curved blades design.
- **Basket:** with a capacity of 100 liters, has a loading/unloading access door.
- **Work door:** manual opening assisted by shock absorbers.
- **Abrasive separator:** high efficiency patented system.
- **Control panel:** mounted in an IP-54 armored enclosure and equipped with a friendly man-machine interface.
- **Dust collector:** has an automatic cleaning with panel type filters with filtering surface of 7.7 m<sup>2</sup>.
